

Approved Products at Starbucks

After thorough research and consultation with other Kashrus Agencies, our Vaad is making changes in the acceptability of several Starbucks Products offered in Starbucks Coffee Houses. Many new flavors and products have been added to the Starbucks menu, and we have researched each one to ensure we are offering current information. We have updated the approved products list to reflect the changes:

- **Drip Coffee**
- **Espresso Shots**
- **Café Americano**
- **Teas**

Flavor shots added to your drinks can be used if you check the bottle for a reliable Hecsher.

No other products are recommended at this time.

**Dallas Kosher
Kosher Certification for Texas and the Southwest**
